### **TRI-FLEX<sup>®</sup> WIRE ROPE**

**US Patent #4,043,581**

Tri-Flex<sup>®</sup> Wire Rope is a three part wire rope made in lengths up to 200' installed on winches for barges, tugs and car pullers. It wraps snugly around the winch hub because it has greater flexibility than standard wire rope. Customers can specify the end attachment required. Tug boat crews were instrumental in helping with the initial product design. Order by specifying rated capacity or finished diameter.
