

Wear Pads

SYNTHETIC ARMOR WEAR PADS

For extra protection for synthetic, wire rope, and chain slings, we have available an assortment of materials that we incorporate in our Synthetic Armor Wear Pads. These are primarily for abrasion or wear protection but can be used for

cut protection in many cases. Not only will these wear pads keep the load from damaging the slings, but they will also protect the load from being scratched by the slings.

Wear Pads and Cut Protectors

Wear pads such as Cornermax™, Synthetic Armor Wear Pads, and Dyneema® Wear Pads protect loads and slings. These wear pads contain a variety of synthetic and metallic materials, and can be made ready to use in any length or width to fit wire rope, chain, nylon webbing, or any regular rope or sling product. They can also be made in long lengths which the customer can cut into suitable sizes on the job. Among all our wear pads and corner protectors, you can find the appropriate materials to provide cut resistance for the most severe conditions.
