

Types

Basic Sling

Types

Type 1

The Web Fitting functions both as a triangle and choker. No more need to position the sling before chocking the load. Fits larger crane hooks than TC and TT sling fittings.

Vertical

Hitches

Choker

Basket

Type 1 TC Slings

Slings with a triangle on one end and with a slotted triangle (the choker) on the other end. Choice of lightweight aluminum or durable steel fittings.

Type 2 TT Slings

Slings with a triangle at both ends. Used in vertical and basket hitches only. Choice of lightweight aluminum or durable steel fittings.

Type 3 EE Slings

Slings with an eye at both ends. Choice of straight or tapered eyes (tapered eyes are standard for 3" web-width and up)

Type 4 EE Slings

Same basic type as Type 3, but the eyes are twisted to a right angle to the sling body. (Tapered eyes are standard for 2" web-width and up).

Type 5 EN Slings

Endless slings, also referred to as grommet slings. Is the most versatile sling.

Type 6 RN Slings

Return eye sling, also referred to as reversed eye sling. Sling body is formed by 2 parts of webbing sewn side by side using a cordura tube which protects not only the sling edges, but the entire sling body.
